- Set up safety gear:** Wear protective eyewear, gloves, and closed-toe shoes.
- Power source:** For electric models, verify the power cord and outlet are suitable. For gas models, check the fuel level and engine oil.

Starting the Pressure Washer

Turn

on the water supply. For electric models, plug into a grounded outlet. Turn on the pressure washer according to the manual—usually, pressing the power button or turning a switch. Engage the trigger on the spray gun to start water flow. For gas models, pull the starter cord after priming the engine.

Adjusting Pressure and Nozzles Select the appropriate nozzle for your task: 0° nozzle: High-pressure concentrated jet, suitable for tough stains. 15° and 25° nozzles: General cleaning, safer for delicate surfaces. Soap nozzle: For applying cleaning detergents. Adjust the spray angle and pressure as needed, always starting with lower pressure settings to prevent damage.

Cleaning Tips and Techniques Maintain a consistent distance from the surface—usually 18-24 inches. Use sweeping motions rather than focusing on one spot. Keep the nozzle moving to prevent surface damage. Test on a small, inconspicuous area first. Use detergent where appropriate, following the manufacturer's instructions.
