Tip: Memorize key molar masses and practice algebraic manipulation to improve speed.

Common Question Themes and How to Tackle Them

Atomic Structure and Isotopes

Focus Points: Understanding atomic number and mass number
Differentiating between elements and isotopes
Calculating neutrons from atomic and mass numbers

Sample Question: "An isotope of carbon has a mass number of 14. How many neutrons does it have?"
Atomic number of carbon = 6
Neutrons = mass number - atomic number = $14 - 6 = 8$
